

Project Motivation

- In the digital age, where information is key, "Global Impact" emerges as more than an online English newspaper—it's a vision. Motivated by the hunger for accessible and engaging news, our project, powered by HTML and CSS, aspires to craft a visually captivating and responsive website. "Global Impact" is not just about delivering timely news; it's a commitment to creating a community hub through interactive features. Seamlessly blending design and functionality, our goal is to redefine news consumption, offering a reliable and enjoyable haven for those seeking a global perspective. Join us on this journey as we shape "Global Impact" into not just a source of news but a dynamic space where information sparks connections and leaves a lasting impression.

81
82 .grid-container {
83   display: flex;
84   flex-wrap: wrap;
85   justify-content: space-around;
86   padding: 20px;
87 }
88
```

CSS

The screenshot shows a code editor interface with a dark theme. The file being edited is named "style.css". The code defines a ".grid-item" class and three media queries for different screen widths. The ".grid-item" class uses flexbox properties to calculate width based on the parent container's width minus 20px for margins and padding. It also sets box-sizing to border-box, a light gray background color (#f0f0f0), and center text alignment. The first media query targets screens up to 768px wide, the second targets screens up to 480px wide, and the third is a general rule starting at line 103.

```
88
89 .grid-item {
90   flex: 0 1 calc(33.33% - 20px);
91   margin: 10px;
92   box-sizing: border-box;
93   background-color: #f0f0f0;
94   padding: 20px;
95   text-align: center;
96 }
97
98 @media (max-width: 768px) {
99   .grid-item {
100     flex: 0 1 calc(50% - 20px);
101   }
102 }
103
104 @media (max-width: 480px) {
105   .grid-item {
106     flex: 0 1 calc(100% - 20px);
107   }
108 }
109
110 /* comments */
```

110 </p>

111 </footer>

112

113

114 <script>

115 function myFunction() {

116 var x = document.getElementById("myTopnav");

117 if (x.className === "topnav") {

118 x.className += " responsive";

119 } else {

A yellow dotted rectangular selection highlights the footer section from line 107 to line 111. A status bar at the bottom left indicates there is one change pending.

CSS

The screenshot shows a code editor interface with a dark theme. On the left, there's a sidebar with icons for search, file operations, and other tools. The main area displays a CSS file named 'style.css'. The code defines a footer with a dark background, white text, and center padding. It also includes a media query for screens up to 768px wide, setting a smaller font size. A note at the bottom indicates the footer is commented out.

```
style.css > ...
112 footer {
113     background-color: #333;
114     color: #fff;
115     padding: 20px;
116     text-align: center;
117 }
118
119
120 @media (max-width: 768px) {
121     footer {
122         font-size: 14px;
123     }
124 }
125
126 /*footer*/
```

CONCLUTION

Our news web page is designed to provide you with a seamless and enjoyable news reading experience. The clean and organized grid layout makes it easy to find the news you're looking for, and the responsive design ensures that the page looks great on all devices. The news cards are concise and easy to read, and the simple UI makes it easy to navigate the page.
